---

## PROFESSIONAL SUMMARY

Results-driven IT Support Specialist and Systems Administrator with 8+ years of experience in ERP administration, user provisioning, identity & access management, and technical troubleshooting. Adept at managing IT infrastructure, supporting end users, and ensuring system reliability across multi-site environments. Creator of PatriotXApp, a SwiftUI/Firebase iOS platform deployed via TestFlight. Bilingual (English/Portuguese). Actively targeting IT Support and IAM roles in the San Francisco Bay Area.

## PROFESSIONAL EXPERIENCE

---

### Founder & iOS Developer | 8 Tentacles Software Development, LLC Dayton, OH · 2023 – Present

- Designed, built, and shipped PatriotX App — a vehicle management and inspection platform — using SwiftUI, Firebase Firestore, Firebase Storage, and Firebase Authentication; distributed via TestFlight.
- Implemented real-time cloud synchronization, OCR-based data capture, and automated reporting modules, reducing manual vehicle check-in time by an estimated 40%.
- Architected role-based access control (RBAC) within the app's authentication layer, ensuring secure, scoped access per user type.
- Managed full project lifecycle: requirements gathering, UI/UX design, backend integration, testing, versioning, and App Store distribution workflows.

### Contractor & Crew Manager | IAA (Insurance Auto Auctions) Dayton, OH · 2023 – 2025

- Supervised vehicle cleaning crews at high-volume automotive auction facilities, overseeing daily scheduling, quality control, and workflow optimization.
- Coordinated cross-team operations to ensure vehicles met presentation, inspection, and compliance standards ahead of auction.

### Independent Contractor | DoorDash Dayton, OH · 2020 – 2022

- Maintained top-tier delivery performance through disciplined route planning, time management, and customer communication in a high-throughput logistics environment.

### Systems Analyst & ERP Administrator | Geraldo Araújo Tecidos Ltda. Brazil · 2008 – 2016

- Administered and supported the Sapiens ERP system across finance, accounting, sales, inventory, and operations — a role directly analogous to enterprise IAM and identity governance responsibilities.
- Developed ERP integrations and automated CNAB banking file processes, eliminating manual reconciliation and reducing processing errors by over 30%.
- Managed SQL Server databases, maintained IT infrastructure (hardware, networking, cabling), and enforced user provisioning and access control policies.
- Generated regulatory compliance reports (SEFAZ, SEF, eDoc, EFD ICMS/IPI), ensuring zero audit findings over 10 years.
- Delivered end-user training programs for 50+ staff across multiple departments on ERP modules and security best practices.

## TECHNICAL SKILLS

---

**Languages & Platforms:** Swift / SwiftUI, JavaScript, SQL, Firebase, Firestore, Node.js

**IAM & Security Concepts:** RBAC, User Provisioning, Access Control, Authentication (OAuth/Firebase Auth), ERP Identity Governance

**Tools & Infrastructure:** Xcode, TestFlight, Git / GitHub, SQL Server, Cloudflare Workers, Railway, GitHub Actions

**ERP & Operations:** Sapiens ERP, CNAB Banking Automation, Financial Reporting, Regulatory Compliance (Brazil SEFAZ/EFD)

**Soft Skills:** Team Leadership, Cross-functional Collaboration, Process Improvement, Bilingual (English / Portuguese)

## EDUCATION

---

### **Bachelor of Business Administration** 2010

*Faculdade Integrada do Recife (FIR) — Recife, Brazil*

### **English Language Studies** 2017

*Language Studies International — Recife, Brazil*

## NOTABLE PROJECTS

---

**PatriotX App** — iOS vehicle inspection & management platform (SwiftUI · Firebase · OCR · TestFlight)

**PatriotX Admin Dashboard** — Real-time web dashboard for PatriotX operations (Next.js 16 · TypeScript · Firebase Firestore · Recharts · shadcn/ui · Tailwind CSS · Framer Motion · Vercel)

- Built multi-module vehicle management system tracking Daily Cleans, Sales Prep, D-ID, and Biohazard jobs with real-time Firestore synchronization.
- Implemented role-based job assignment, status workflows (Pending / Active / Completed), and advanced filtering by branch, status, and date range.
- Designed dynamic analytics dashboards with Recharts, custom 3D visuals via Three.js, and smooth UI animations via Framer Motion — deployed to Vercel.
